PUBLIC NOTICE
FOR IMMEDIATE RELEASE

December 9, 2021

The South Haven Area, Water & Sewer Authority, has contracted with HydroCorp of Troy, MI, to perform the State Mandated Cross Connection Control Program. The Cross-Connection Control Program aims to help eliminate possible contamination of the public water distribution system. There are two required components of the program; 1) site inspection and 2) testing of backflow prevention assemblies. Thank you in advance for your cooperation in this matter.

As part of this program, a survey of the internal water system at your property will be completed. Inspectors will be reviewing the water system immediately around your water meter in your basement and on the outside of your home for connections that could contaminate the water distribution system. There are no fees for the inspection(s); however, any costs associated with installing, replacing, or modifying backflow prevention assemblies and devices or any other work required for compliance are the property owner's responsibility.

For further questions on cross-connections and inspections, please visit:
